

# *Notes From The Arborist*

## Winter is a Great Time for Tree Work!

- *Enhance Views*
- *Prune Trees & Fruit Trees*
- *Large Tree Removals/Clearing*

### What Makes Winter so Ideal?

- Leaves don't block the view potential.
- Frozen ground minimizes damage to lawns, gardens and forest floors.
- Dormant pruning prevents the spread of disease, helps the arborist with increased visibility in the crown of the tree and minimizes tree shock because there is no leaf loss.
